

E&A Well Approval Process

All periods are minimum durations.
Please initiate contact as early as possible

*Wells inshore and in environmentally sensitive locations may take longer than 12 months

**Best practice to submit IDA 3 months prior to spud in conjunction with pre-drill assessment (SE2)

***Operators need to submit a drilling application in WONS before the well operator can submit data into PETS. Licence operators can initiate this process by submitting a provisional drilling application via WONS if they are not in a position to submit a full initial drilling application
